

PEDIATRIC CHIROPRACTIC INTAKE FORM

(0-12years)

Patient Information

Date: _____ Child's Name: (last) _____ (first) _____

Parent 1 Name: _____ Parent 2 Name: _____

Address: _____

Postal Code: _____ Phone: (1) _____ (2) _____

Email _____

Child's Age: _____ Weight: _____ Height: _____

Birth date: _____ Birth Place: _____

Family MD/Pediatrician: _____ AHC #: _____

Referred by: _____

Current Health Condition

Purpose of appointment/current complaint: _____

When/how did the current complaint occur: _____

Is this complaint: (circle): new/recurring

Did it come on (circle): suddenly/gradually/comes & goes

Did a fall, injury or trauma contribute to the current complaint: _____

Is your child presently taking medication/or under any other medical care: _____

For what conditions: _____

Past Health History

Birth History:

Length of Pregnancy: full term (weeks) _____ / early (weeks): _____ /late (weeks): _____

Any issues during pregnancy for mom/baby: (position of baby, blood pressure etc.) _____

Type of delivery: (circle) Vaginal/ Breech/ Cesarean Birth Interventions: Epidural/ Forceps/ Vacuum

Length of labour: _____ Delivery Complications: _____

Birth Weight: _____ Birth Length: _____ Congenital anomalies: _____
APGAR Score: _____

INFANT HISTORY

Feeding: (circle) Breast/ Bottle/ Formula Latching well: Y/N Breast preference: Y/N/right/left
Sleep Quality: good/fair/poor Average hours/night _____ Average hours in a row: _____
Trouble falling asleep: (circle) always/occasional/never Mouth Breather: Y / N

General Health History:

Any known Health conditions/Allergies:

Illness/Injuries:

Hospitalizations/Surgeries/ Stitches/ X-rays

Previous Massage/ Craniosacral Treatment: _____ Date: _____

Vaccination history: _____

Last doctor's appointment: _____ Concerns: _____

Treatment for any health conditions in the past year: _____

Lifestyle:

Computer/desk / Sitting Time: _____ hours/day Screen Time: _____ hours/day

Activity/ Play/ Outdoor Time: _____ hours/day Activities/ Sports: _____

Diet: Any dietary concerns or restrictions? _____

Fruits & Veggies: Never / Sometimes / Several each day Sweets/sugars:

Never / Sometimes / Several each day Dairy: Never / Sometimes /

Several each day

Processed Foods: Never / Sometimes / Several each day

Sleep Quality: (circle) Good/fair/poor Hours of Sleep Per Night : _____

Please check any of the following conditions that are currently a problem; and underline any that were a problem in the past:

MUSCLE & JOINT

Sore muscles
Sore joints
Growing pains
Muscle cramps
Muscle jerking
Back problems
Neck problems
Painful tailbone
Pain between the shoulders
Spinal curvature
Arthritis
Difficulty chewing
Clicking in jaw
General stiffness
Walking concerns
Feet turn out/ in
Coordination difficulty
/ Clumsy
Frequent Falls
Headaches
Pain in ankles /knees /hips

GENERAL

Fatigue
Allergies
Difficulty Sleeping
Open Mouth Breathing
Dizziness/ fainting
Earaches / infections
Nose bleeds
Sore throat/ frequent colds/flu
Asthma
Chronic cough
Enlarged glands
Loss of weight
Poor exercise/ appetite
Nervousness
Depression/ confusion
Vision/ dental/ hearing
problems
Hyperactivity
Trouble Focusing
Behavioural
Challenges
Anxiety
Learning Challenges
Epilepsy/ Seizures
Rheumatic fever
Stomach aches

INFANCY

Colic
Tilting head to one side
Difficulty nursing
Preferred side nursing
Slow weight gain
Fussing in specific positions
Screaming/ crying

ORGANS

Bedwetting
Constipation/ diarrhea
Anemia
Thyroid issues
Vomiting
Skin eruptions/ eczema

OTHER CONCERNS:

CANADIAN CHIROPRACTIC PROTECTIVE ASSOCIATION

CONSENT TO CHIROPRACTIC TREATMENT – FORM L

It is important for you to consider the benefits, risks and alternatives to the treatment options offered by your chiropractor and to make an informed decision about proceeding with treatment. Chiropractic treatment includes adjustment, manipulation and mobilization of the spine and other joints of the body, soft-tissue techniques such as massage, and other forms of therapy including, but not limited to, electrical or light therapy and exercise.

Benefits

Chiropractic treatment has been demonstrated to be effective for complaints of the neck, back and other areas of the body caused by nerves, muscles, joints and related tissues. Treatment by your chiropractor can relieve pain, including headache, altered sensation, muscle stiffness and spasm. It can also increase mobility, improve function, and reduce or eliminate the need for drugs or surgery.

Risks

The risks associated with chiropractic treatment vary according to each patient's condition as well as the location and type of treatment. **The risks include:**

- **Temporary worsening of symptoms** – Usually, any increase in pre-existing symptoms of pain or stiffness will last only a few hours to a few days.
- **Skin irritation or burn** – Skin irritation or a burn may occur in association with the use of some types of electrical or light therapy. Skin irritation should resolve quickly. A burn may leave a permanent scar.
- **Sprain or strain** – Typically, a muscle or ligament sprain or strain will resolve itself within a few days or weeks with some rest, protection of the area affected and other minor care.
- **Rib fracture** – While a rib fracture is painful and can limit your activity for a period of time, it will generally heal on its own over a period of several weeks without further treatment or surgical intervention.
- **Injury or aggravation of a disc** – Over the course of a lifetime, spinal discs may degenerate or become damaged. A disc can degenerate with aging, while disc damage can occur with common daily activities such as bending or lifting. Patients who already have a degenerated or damaged disc may or may not have symptoms. They may not know they have a problem with a disc. They also may not know their disc condition is worsening because they only experience back or neck problems once in a while.
 - Chiropractic treatment should not damage a disc that is not already degenerated or damaged, but if there is a pre-existing disc condition, chiropractic treatment, like many common daily activities, may aggravate the disc condition. The consequences of disc injury or aggravating a pre-existing disc condition will vary with each patient. In the most severe cases, patient symptoms may include impaired back or neck mobility, radiating pain and numbness into the legs or arms, impaired bowel or bladder function, or impaired leg or arm function. Surgery may be needed.
- **Stroke** – Blood flows to the brain through two sets of arteries passing through the neck. These arteries may become weakened and damaged, either over time through aging or disease, or as a result of injury. A blood clot may form in a damaged artery. All or part of the clot may break off and travel up the artery to the brain where it can interrupt blood flow and cause a stroke.

- Many common activities of daily living involving ordinary neck movements have been associated with stroke resulting from damage to an artery in the neck, or a clot that already existed in the artery breaking off and travelling up to the brain.
- Chiropractic treatment has also been associated with stroke. However, that association occurs very infrequently, and may be explained because an artery was already damaged and the patient was progressing toward a stroke when the patient consulted the chiropractor. Present medical and scientific evidence does not establish that chiropractic treatment causes either damage to an artery or stroke.

The consequences of a stroke can be very serious, including significant impairment of vision, speech, balance and brain function, as well as paralysis or death.

Alternatives

Alternatives to chiropractic treatment may include consulting other health professionals. Your chiropractor may also prescribe rest without treatment, or exercise with or without treatment.

Questions or Concerns

You are encouraged to ask questions at any time regarding your assessment and treatment. Bring any concerns you have to the chiropractor's attention. If you are not comfortable, you may stop treatment at any time.

Please be involved in and responsible for your care. Inform your chiropractor immediately of any change in your condition.

DO NOT SIGN THIS FORM UNTIL YOU MEET WITH THE CHIROPRACTOR

I hereby acknowledge that I have discussed with the chiropractor the assessment of my condition and the treatment plan. I understand the nature of the treatment to be provided to me. I have considered the benefits and risks of treatment, as well as the alternatives to treatment. I hereby consent to chiropractic treatment as proposed to me.
